

Anatomy Studyguide for Lab Practical:

*Be able to identify and state the function of:

Masseter muscle	Small intestine
Salivary glands	Large intestine
Salivary ducts	Spleen
Hard palate	Kidneys
Soft palate	Stomach
Epiglottis	Gallbladder
Trachea	Pancreas
Esophagus	Liver
Diaphragm	Pericardium
Heart (also know type of muscle and difference between atria and ventricles)	
Lungs (also know which one has 4 lobes)	
Umbilical cord	

*Be able to identify gender

*Be able to tell which organs produce sperm and egg

*Be able to compare abdominal cavity vs. thoracic cavity

*Be able to identify medical uses for pigs

*Be able to identify largest organ, largest abdominal organ, etc.

*Be able to describe diet of pigs- which classification they are

*Be able to identify functions of bacteria in digestive tract, veins, arteries
